BOOTCAMP FULL-STACK DEVELOPER

KODILLA

1:1 mentor support.

The course included knowledge of frontend and backend development of web applications

LANGUAGES

English - B2

PROJECTS

INDIVIDUAL PROJECT - **CHOCO-SHOP**

github.com/karollion/Choco-Shop-FS

Full-stack application for an online store selling chocolate products and other sweets. Shopping can be done as a guest or as a logged in user. On the home page, you can sort products by categories, and you can also search for a specific product on the search page. In the cart, you can change the number of pieces, size and add comments to the ordered product.

Technologies - JavaScript, React, Redux, Node.js, Nest.js, Prisma, MySQL

TEAM PROJECT - **FURNITURE SHOP**

github.com/karollion/projekt-zespolowy-wdp-2309-01

In this project, I made the first section with promoted furniture and the feedback sections. Additionally, I RWDed the top menu, promoted, feedback and brands sections. I also added hover effects and hover animations.

Technologies - JavaScript, React, Redux

INDIVIDUAL PROJECT - **MUSIC SERVICE**

github.com/karollion/Project-Music

The main page contains all songs, and you can also filter songs by genre. The search tab allows you to find songs by genre, title or author. The last tab selects a song from the most frequently played songs genre.

Technologies - HTML, SCSS, JavaScript

EDUCATION
